

About Us

Company founders Glen Coleman and Carol Stebbins are lifelong residents of the Tampa bay area. Asset Recording Services, Inc. was formed in response to increasing property and casualty premiums and correspondingly diminished coverage for insured property. As the insurance industry seeks to mitigate purported "losses" by parsing contract language and dodging claims payouts through the courts, property owners must prepare to defend their investment in premiums by documenting their property proactively in anticipation of filing future damage claims. Candidates facing the rigors of a Sarbanes-Oxley or Model Audit review can make the business case for a comprehensive inventory of assets to validate their Profit & Loss statement while demonstrating best business practice.
