

Insurance Professionals

Request a review of the completed inventory manifest to assess coverage needs from your insured clients. A ‘pre-loss’ inventory manifest and images of insured property should be reviewed with your insured client and at the same time, make sure they understand coverage. Emphasize the importance of disaster planning that includes a detailed list of insured content paired with supporting receipts and certificates of provenance. The ability to display still image(s) and video with narrative afford the insured owner every opportunity to maximize any future claim for damage or loss.

We also provide support for the following professionals:

Certified Public Accountants

Financial Advisors

Estate Planners

Decision Makers – Leadership

Insurance Professionals

Religious & Non-Profit Organizations
